Product Summary

The Feast is a classic round dining table with a 48" diameter top, providing seating for 6-8 adults. Inspired by sturdy, heavy farmhouse dining tables, the Feast is the intersection of the need for quality outdoor furniture and environmental stewardship through the use of recycled plastic bottles and jugs. Repurposed and recycled, millions of pounds of plastic are diverted from landfills to fabricate HDPE boards which Fire and Feast uses to handcraft outdoor tables and chairs. The Feast dining table is available in 20 solid colors, as well as a two tone combination of white and any other solid color. For any other color combination, select the option "Email or Call" from the dropdown list of colors below and you will be contacted by a Fire and Feast craftsman to discuss and confirm your custom color selection.

Please [contact us](#) to receive a free color sample to ensure that you select the desired color for your chairs.

WHY HDPE?

Fire and Feast furniture is constructed using 18-8 stainless steel fasteners, thus preventing corrosion and rust on furniture hardware and more...

HDPE lumber stops hundreds of millions of plastic containers from entering the landfill waste stream through the production of recycled HDPE resin made from post consumer materials, thus supporting a net positive impact on the environment

HDPE furniture is resistant to mold, mildew, and UV sunlight

HDPE used in building Fire and Feast furniture does not splinter, warp, crack, or split, unlike wood

HDPE is uniform in color throughout the material and is subject to minimal fading, thus eliminating the need to paint

The only maintenance needed is an occasional seasonal wash with a hose, mild soap, and a soft brush to rinse accumulated dirt
