## Product Summary

The Fireside Standard Adirondack Chair is the first chair produced by Fire and Feast Products in the Fireside Family of chairs. The two features that distinguish the Fireside Standard from its siblings are a 16" seat depth coupled with a square edge at the end of the seat where the user's knees are bent to put rest the feet on the ground.

The Fireside is available in 20 stock solid colors, as well as a two tone combination of white and any other solid color. For a custom look, mix or match any two colors by selecting the "email or call" option from the drop down color menu.

Please [contact us](#) to receive a free color sample to ensure the desired color selection, or to schedule a consultation with a Fire and Feast craftsman to discuss additional customization options.

## Product Description

### WHY HDPE?

Fire and Feast furniture is constructed using 18-8 stainless steel fasteners, thus preventing corrosion and rust on furniture hardware and more...

HDPE lumber stops hundreds of millions of plastic containers from entering the landfill waste stream through the production of recycled HDPE resin made from post consumer materials, thus supporting a net positive impact on the environment HDPE furniture is resistant to mold, mildew, and UV sunlight

HDPE used in building Fire and Feast furniture does not splinter, warp, crack, or split, unlike wood

HDPE is uniform in color throughout the material and is subject to minimal fading, thus eliminating the need to paint

The only maintenance needed is an occasional seasonal wash with a hose, mild soap, and a soft brush to rinse accumulated dirt
